

USB Type-C cable

Connects to car power socket (12V/24V)

Dual USB car charger (2.4A)

Dual USB

car charger with integrated Type-C cable

Plug and power convenience for people on-the-go

Charge your mobile phone, GPS and more from your 12V/24V accessory power socket of your car, truck or SUV. This convenient car charger allows you to plug up to three USB powered devices at a time simultaneously without cluttering your vehicle's dashboard and console areas.

Highlights

- Stylish and compact, fits in the accessory socket space of most vehicles
- Features a fully reversible Type-C connector compatible with the latest generation of USB devices
- Dual USB ports for charging two devices simultaneously, with a combined maximum output of 2.4A
- Reliable charging with over-current, over-charging, short-circuit protection, no risk of overheating or damaging your devices
