

ErgoBall

Wireless trackball mouse

User-friendly programmable interface

Advanced precision with maximum comfort

Optimize your business environment with the new technology the KMW-800 has to offer. This wireless trackball mouse combines maximum comfort with total cursor control. Its ergonomic design lets you rest your palm entirely over the mouse avoiding repetitive strain injury. It features a sculpted and stable trackball with 5 levels of DPI resolution, which increases cursor's precision significantly with only the roll of your thumb. This mouse is also fully programmable through a user interface design software to customize its 7 buttons to your best usage conditions. Let the KMW-800 be the perfect ally in your daily routine to get more work done in less time.

Highlights

- Wireless 7-button trackball mouse with a comfortable ergonomic design and stable trackball perfect for busy workspaces or desktops
- Convenient tiny wireless receiver that can stay plugged into the USB or tucked into the storage compartment
- It features a 1.25in large trackball with optical sensor for accurate and precise cursor control
- Greatly reduces muscle twisting and pain with a more comfortable hand position and minimum arm movement
- Customize your trackball's buttons to suit your needs through a user-friendly programmable interface – change lighting options, DPI speeds, etc.
- Removable trackball for easy cleaning – just push it out and back in a snap
- Features an adjustable DPI switch with cursor speeds from 400 to 4,800
- Browse your favorite websites easily or move quickly between documents with its convenient Back/Forward buttons
- Equipped with a power ON/OFF switch to maximize your battery life up to 6 months
- Extremely durable and reliable through its 10-million times lifecycle micro switch
